EXPERIMENTS IN KOCHI: EARLY RESULTS

Sugar content: time analysis

Control Experimental Difference
1st month 9,5±0,8 10,5±0,4 +1
2nd month 10,4±0,5 12 ±1,3 +1,6

Spatial analysis (over the 2 months):

Experimental: 11,34 \pm 1,25 (n = 7) Classical music (Ravel): 10,24 \pm 1,16 (n = 5) Next to heating: 10,17 \pm 1,13 (n = 6) True control: 9,72 \pm 0,75 (n = 18)

The difference in sugar content between experimental and centrol tomatoes is highly significant.

Distribution du teux de sucre

d = 5m
